# CONTRACTOR

days

14 - 15 DEC 2022  
BRUSSELS KART EXPO

## A new event

Contractor Days is a new two-day trade event organized by and for professional service suppliers within the agricultural sector. Contract workers face a constantly changing profession with techniques being renewed and regulations and training being adjusted permanently. The sector furthermore represents a substantial part of our economy. Time to organize a dedicated event, supported by national and international professional federations from the sector. An opportunity for all professionals involved to meet each other. From 2020, Contractor Days definitely will be the ultimate meeting place in its professional field.

## For and by Professionals

Bringing together professionals so that they can inform themselves, discover new evolutions within their field and learn from each other: that is the goal of Contractor Days. To achieve this goal, a sector-neutral event partner has been appointed to ensure the smooth

running of these two days. This must allow all entrepreneurs and customers to meet their suppliers, strengthen their cooperation, make new agreements and discover new products. As a sponsor, exhibitors can strengthen their brand and name recognition by being present around the central area and showing their latest products. In other words: Contractor Days offers the perfect opportunity for professionals.

## An ideal date

The date of the show has been chosen in order to allow all professionals/contractors to participate. It will be an ideal time to reflect on your activities, take in new trends, prepare for the new year and develop future investment plans.

## Brussels, the heart of Europe

Brussels Kart Expo is located in the capital of our country and combines all necessary facilities for visitors, participants and sponsors of Contractor Days.

## Strong partners

A professional event must both be representative of the sector and supported by the sector. Contractor Days is supported by the national professional federation and already has an international collaboration with DeLuTa in Bremen. The federation will of course be present as well and, in the run-up to the event, additional organizations, including the professional media from the sector, will be included in the list of partners.

## An extensive programme

Lectures, demonstrations, workshops and information stands will provide content and give an idea of what to expect in the sector in the near and distant future.

## A selection of possible lectures:

- › Cost calculation
- › Lease or buy
- › Drones
- › Safe agricultural traffic
- › Fuel savings
- › End of career planning
- › Starting with personnel
- › Working with the self-employed
- › Companies Act
- › CLA flexibility
- › Diversification: sell phytoproducts, seeds, fertilizers, grains, ... what is possible?
- › How to respond to an incident involving phytoproducts
- › ...

Visitors can freely choose which part of the programme they want to follow. All visitors always come back to the central zone for networking at one of the cosy catering points. There they also meet the exhibitors who show and demonstrate their latest machines, products or services.
